

## Build Night #6

Logan Jackson

Machine Learning and Parametric Design for Sustainable Living

# Last Last Week Professor Meeting

Update

# Progress

How is it, what are we doing

# Questions

Do you have any questions / need any help with the project as of right now?

# Presentation

At this point I think we are on track to be finished with the project on time, and have everything prepared for the symposium, this week on saturday there's a social and workshop and the workshop is getting started with latex which will be important for creating the poster. Remember to keep track of what you're doing, update the github etc.

Good Luck!
